Security

Security Information for investors

KONG INU is designed from the ground to be safe for our investors. Our token smart contract is designed to be sustainable. In addition, the KONG INU smart contract has implemented important security features.

LOCKED LIQUIDITY POOL:

[ADD LINK HERE]

The liquidity pool tokens for KONG INU are permanently locked. This means that the project cannot have the liquidity removed or pulled out. This is a security measure to protect investors from what is known in the crypto community as a rug pull.

ANTI BOT & ANTI SNIPER:

Our contract employs an Anti Sniper & Bot system on launch, blacklisting wallets using bots to gain an unfair advantage over genuine investors.
